Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Agreed that the combination of references would not read on when the broadcast identifier is not the same as the identification of a broadcast signal source. Discussed applicant's position that Larsen is a matching technique, instead of actually identifying the TV broadcast (signal source). Also, applicant argues that Larsen is directed to searching for content, as opposed to broadcast source. Applicant also argues that Wegrzynowicz operates by routing, instead of creating a subset of data as claimed Examiner's position is that in Larsen, the user inputs the 'broadcaster', which corresponds with the claimed broadcast identifier. Also, the claimed identifying feature corresponds with the 'matching'.
